

Multi-Cartridge Filter Vessel

Multi-cartridge filter vessels provide economical filtration in a lightweight, externally polished stainless-steel design.

Designed for Ease of Use

- Swing bolt secured quick opening cover
- Internal positive pressure cartridge alignment and sealing plate
- Standard with EPDM seals
- Sample port on inlet and outlet for easy access

Different Sizes Accommodate a Variety of Filters

- The vessel accommodates 20", 30" or 40" long cartridges
- Cartridges can be double open end (DOE) or 222 single open end (SOE)

Corrosion Resistant

- Manufactured from polished and passivated stainless steel and rated for 150 PSI
- For added corrosion resistance, all cover bolt and leg mounting hardware is made from stainless steel as well.

Rust-free, stainless steel housing is easy to use and lasts for years.

Cartridge Filter Vessel Model	Gallons Per Minute	Dimensions H x W	Connections	Cartridge Size	# Cartridges	Absolute CMF Cartridge Model
